CNC REAR PROJECTION FILM

CNC rear projection films can be easily applied to glass / Plexiglas.

Width 1524mm X Length 30m/roll

Multiple pieces of film can be joined on glass to create large format displays.

=Pro Diffusion Rear Projection Film

Pro Diffusion film is a high contrast rear projection film mainly used for store window displays and high end video applications. This rear projection screen film offers superior brightness, contrast and black levels even in high ambient light and daylight.

Shapes and sizes are also available for customization and pieces can be joined to create large format displays.

Pro Diffusion film has a self adhesive layer (peel and stick) making it easy to apply to any kind of glass or Plexiglas.

=High Gain Rear Projection Film

High Gain rear projection film is a specialist rear projection film primarily used for store window displays and advertising screens. This low cost projection film offers superior brightness in high ambient light and daylight.

What kinds of shapes and sizes are also available for customization and multiple pieces can be joined to create large format displays.

High Gain rear projection film is manufactured with a self adhesive layer meaning it can be easily applied to glass or Plexiglas. High Gain film is a cost effective screen technology which can perform well with lower powered, less expensive projectors.

CNC-Projection Glass Film

Specifications :

Color: Transparent, Gray, Double Gray, White, Double White

Width: 1524mm (60")

Length: 1 roll = 15 meters (Minimum Order)

Haze: 33%

Thickness: 100µm

UV-Fading Protection % : 0.20%

Visible-Natural Daylight %: 70%

SHGC-Heating &

Cooling cost %: 0.6
